Requirement for connect to wifi ONEKalbe.net;

- 1. Install antivirus (kaspersky) and full scan
- 2. Daftar mac address wifi PC/Laptop ke server radius
- 3. Sudah punya akun vpn/radius
- 4. Connect to wifi ONEKalbe.net

Untuk Poin 1, 2, dan 3 bisa hubungi servicedesk

Berikut adalah cara untuk connect ke wifi ONEKalbe.net untuk komputer dengan Windows7;

Klik Start - Control Panel

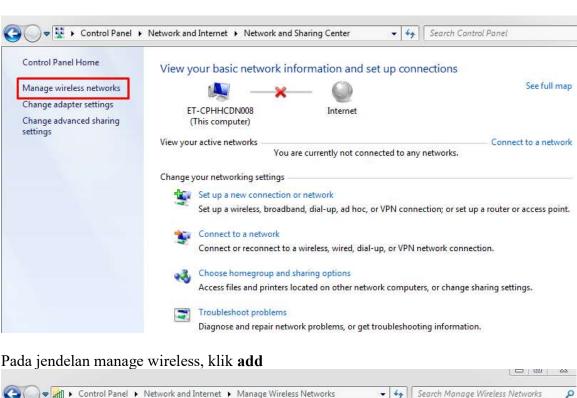

### Pada Network and Internet Klik View network status and task

Adjust your computer's settings

#### Klik Manage wireless networks

Pada jendela manually connect a wireless network

Manually connect to a wireless network

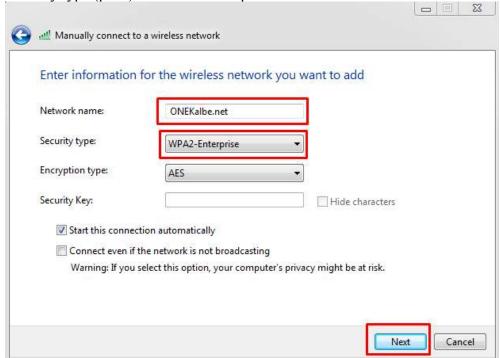

How do you want to add a network?

Manually create a network profile
This creates a new network profile or locates an existing network and saves a profile for the network on your computer. You need to know the network name (SSID) and security key (if applicable).

Create an ad hoc network
This creates a temporary network for sharing files or an Internet connection

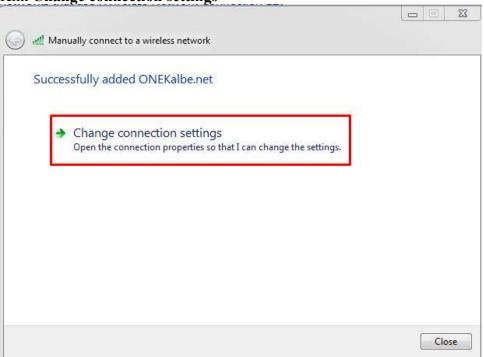

Isikan sebagai berikut;

Network name : ONEKalbe.net Security type (pilih) : WPA2-Enterprise

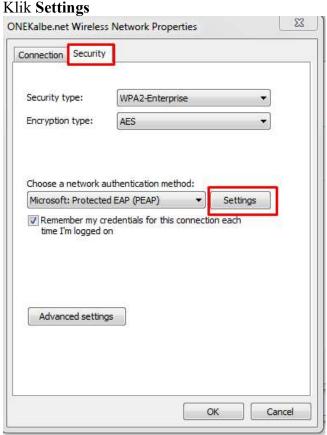

Lalu klik Next

Klik Change connection settings

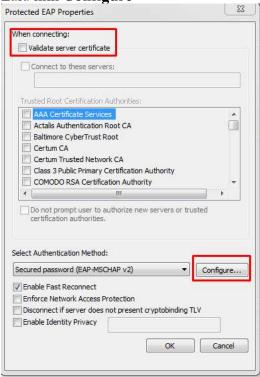

## Masuk ke tab Security

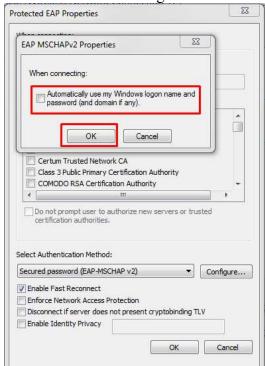

Non-aktifkan (uncheck) Validate server certificate

Lalu klik Configure

Non-aktifkan (uncheck) Automatically use my Windows logon name and password (and domain if any)

Lalu konfirmasikan dengan klik **OK** 

#### Klik OK

#### Klik Advance Settings

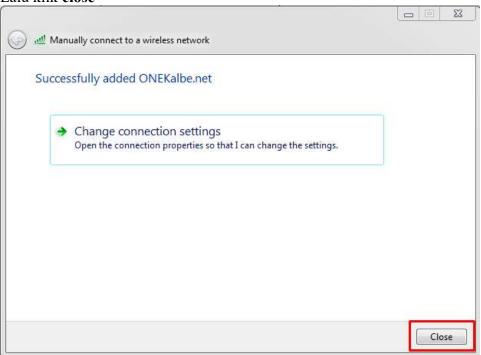

# Aktifkan (check) **Specify authentication mode**: Pilih **User or computer authentication**Lalu klik OK

#### Selanjutnya klik OK

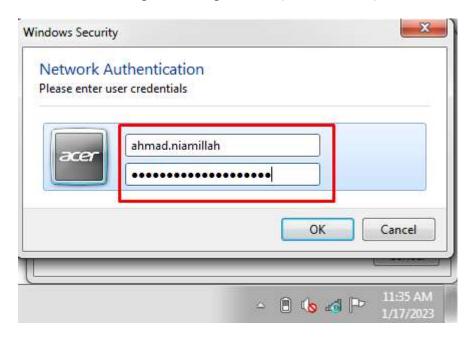

#### Lalu klik close

Pada pojok kanan bawah, klik icon wifi Pilih **ONEKalbe.net**, lalu klik **Connect** 

Masukan akun dan password vpn/radius (liat halaman 1)

Komputer sudah terkoneksi dengan ONEKalbe.net seperti contoh di bawah ini.
